

eToro adds Theta Network and Fantom

March 15, 2022: eToro, the social investment network, announced today that it has added two new assets to its investment platform⁽¹⁾.

Theta Network (THETA), Fantom (FTM), are now available on eToro bringing the total number of cryptoassets offered to 57^(2,3).

Theta Network (THETA) is the next generation media and entertainment focused blockchain. Theta infrastructure enables existing video and media platforms to drive incremental revenues and reduce content delivery CDN costs while rewarding end-users for sharing their storage and/or bandwidth on any PC, mobile, Smart TV or IoT device. Theta supports Turing complete smart contracts, and is fully compatible with Ethereum. This enables a wide range of interesting Web3 applications to be built on the Theta Network

Fantom (FTM) is a scalable smart contract platform based on a unique consensus mechanism known as Lachesis. FTM is the native asset of the Fantom blockchain, and is used for paying network fees, securing the network through staking, and voting on governance proposals.

“The addition of these two coins continues our commitment to offer our users more opportunity to diversify their portfolios with a broader range of cryptoassets. We will continue to expand our range of cryptoassets with more coins coming soon. As always, we urge investors to do their research by looking into each cryptoasset’s use case”, **said Tomer Niv, Director of Global Crypto Solutions at eToro.**

eToro has been offering retail clients access to the crypto markets since 2013. eToro’s users can easily buy, hold and sell the real underlying assets of Theta Network (THETA), Fantom (FTM) on its investment platform, using fiat currency.

For now, these coins will not be available to US users.
