## Objectives and Investment Policy

- ▶ The Unit Class iShares EURO STOXX Banks 30-15 UCITS ETF (DE) EUR (Dist) (the "Unit Class") is a unit class of the iShares EURO STOXX Banks 30-15 UCITS ETF (DE) (the "Fund") which is a passively managed exchange traded fund (ETF) that aims to track the performance of the EURO STOXX® Banks 30-15 (Net Total Return Index) as closely as possible. In this regard, it aims to replicate the benchmark (Index).
- ▶ The Index tracks companies in the banking sector in the Euro zone included in the multi-sector EURO STOXX® index. This in turn tracks companies with a large, medium and small market capitalisation in developed economies in the Euro zone. The market capitalisation is determined by multiplying the current share price with the total number of shares of a company. The Index is capped at 30% for largest and 15% for the second largest constituent, in order to comply with UCITS diversification criteria.
- ▶ The Fund mostly invests in equities in order to achieve the investment objective.
- ▶ The proportion of assets in the Fund which matches the weighting of the Index (duplication percentage) is at least 95% of the Fund's assets.
- ▶ It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ This Unit Class is distributing. Income from the Unit Class' investments will be paid out at least once a year as a dividend.
- ▶ The Unit Class is denominated in Euro.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange (s). Indicative net asset value is published on relevant stock exchanges websites.
